**SOLAR MINING RESOURCES LTD**  
**ANNEXURE-1**  
**SIGNIFICANT ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2016**

**a. Basis of preparation**

The financial statements are prepared under the historical cost convention in accordance with the generally accepted accounting principles in India (Indian GAAP), including the Accounting Standards notified under the relevant provisions of the Companies Act, 2013.

The financial statements have been prepared on an accrual basis. The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

**b. Use of estimates**

The preparation of financial statements in conformity with India GAAP requires judgements, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known/ materialised.

**c. Borrowing costs**

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period in which they are incurred.

**d. Revenue recognition**

Revenue is recognized only when it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operations includes sale of goods, services, sales tax, service tax, excise duty and sales during trial run period, adjusted for discounts (net) and gain / loss on corresponding hedge contracts. Gross Turnover includes sales tax, service tax and excise duty. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year. Dividend income is recognized when right to receive is established. Interest income is recognized on time proportion basis taking into account the amount outstanding and rate applicable.

Revenues from hire charges for delivery of goods are recognized on delivery of goods.

**e. Earnings Per share**

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. There are no potential equity shares as on 31.03.2016 and accordingly the Diluted Earnings per share and Basic Earnings per share will be same.

**f. Provisions**

A provision is recognized when the company has a present obligation as a result of past event. It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and

reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Where the company expects some or all of a provision to be reimbursed for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expenses relating to any provision is presented in the statement of profit and loss net of any reimbursement.

**g. Cash and Cash equivalents**

Cash and cash equivalents for the purposes of cash flow statement comprise Balances with bank and Cash in hand.

**h. Inventories**

Items of inventories are measured at lower of cost and net realisable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overheads incurred in bringing them to their respective present location and condition. Cost of raw materials, stores and spares, packing materials, trading and other products are determined on weighted average basis.
